Re: DISPOSAL OF TPH SOILS FROM MELVILLE NORTH LANDFILL, NEWPORT

Dear Mr. Kulpa:

The Navy proposes to relocate TPH-contaminated soils excavated during the Melville North Landfill removal action to a bermed and poly-lined area at NETC Site 13, Tank Farm 5 for the purposes of bioremediating in windrows or by another appropriate method. Soils failing TCLP for lead, and asbestos-contaminated soils from the excavations will not be included.

As indicated in our 11 October conversation, a rapid turnaround on this question is necessary to allow continued work at the removal site, and any delay may necessitate disposal of soils off site at greater expense.

If you have any questions or to provide your concurrence, please contact me at 610-595-0567 ext 134.

Sincerely,

  
R. KRIVINSKAS  
Remedial Project Manager  
By direction of the  
Commanding Officer
